SMART AIM

All children age 0 to 27 months who receive primary care at PHHC to have two ASQ screens and one ASE-SE from 61% to Y% by June 2019

Improving ASQ Screening at Price Hill Clinic Key Driver Diagram (KDD)

Project Leader(s): Sarah Tarai, MD

Revision Date: 05/2018 (v1)

Global Aim

Help Cincinnati's 66,000 children be the healthiest in the nation through strong community partnerships

SMART Aim

Increase the number of children receiving 2 ASQ and 1 ASE-SE screening tests from 61% to y% by June 2019

Population

Patients 0 – 27 months at Price Hill Clinic

Key Drivers

- Timely and accurate communication and handoff among staff
- Timely and accurate documentation on ASQ worksheets and in EPIC
- Accurate identification of children in need of ASQ screen
- Consistent process among providers
- Engaged and informed patients/caregivers on ASQ screening
- Motivated, patient centered team

Interventions (LOR #)

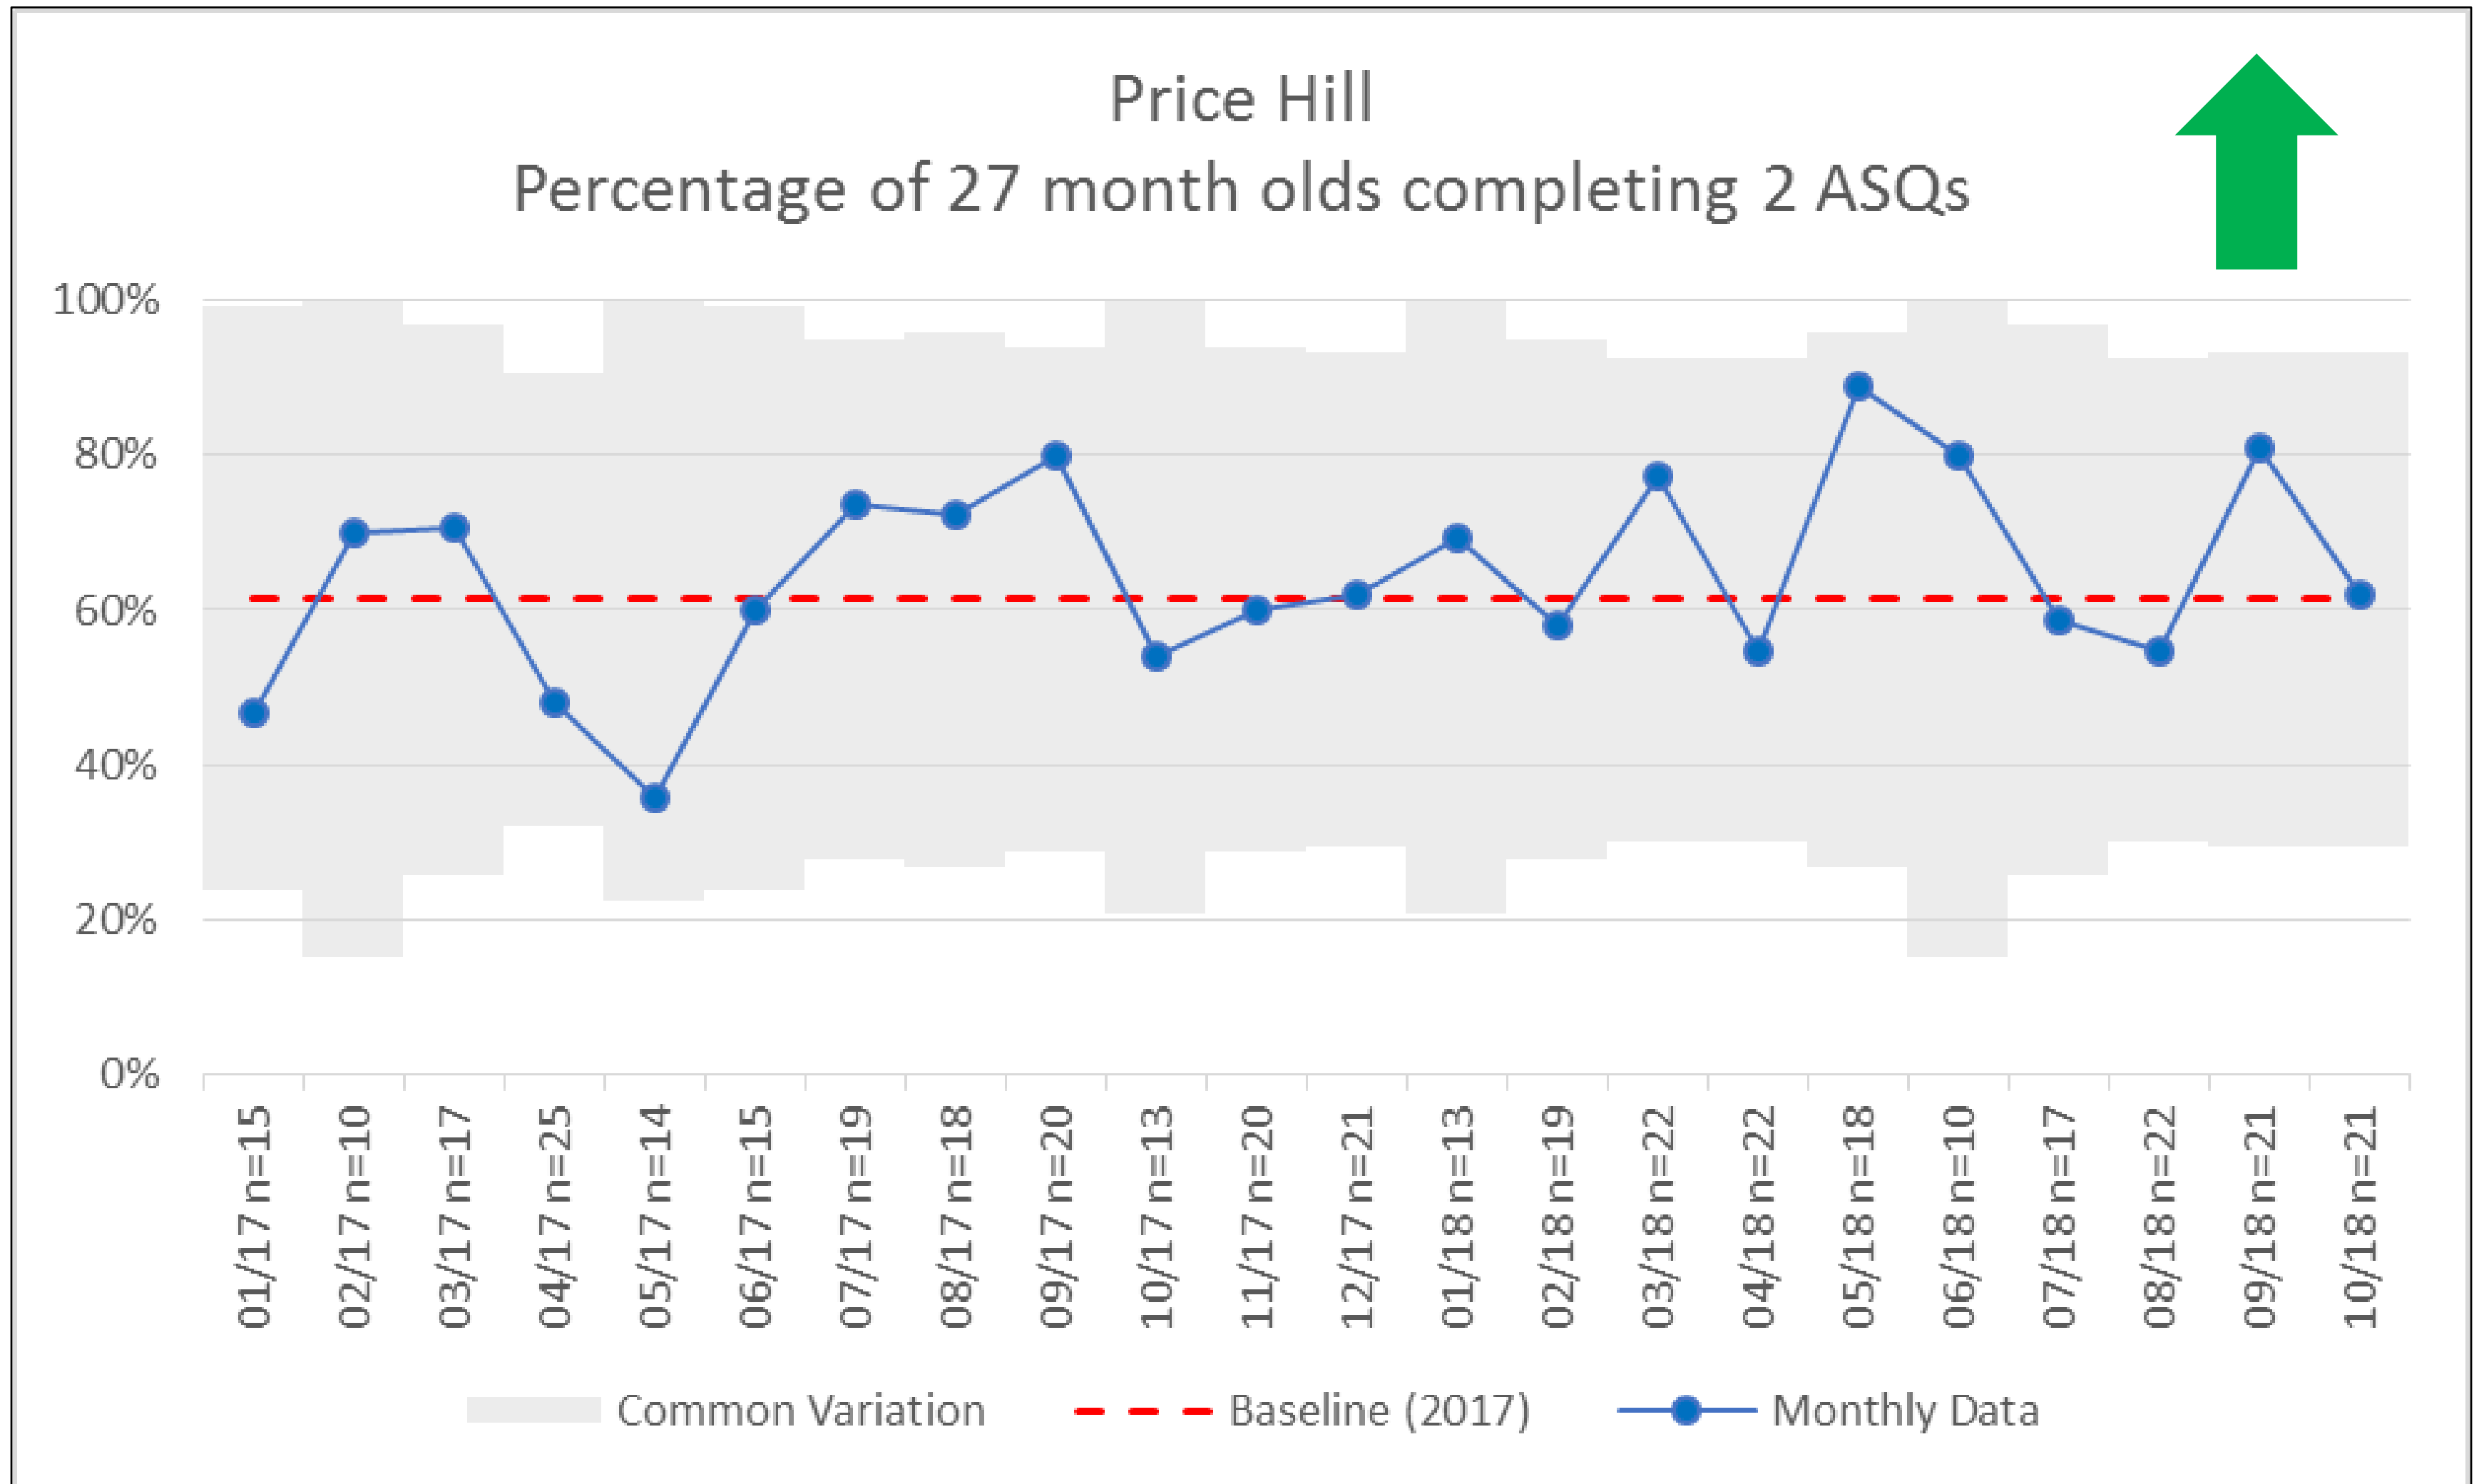

- Daily pediatric huddles
- Standardized procedures
- Training/Education for Staff
- Real time review of data, dashboard, failures
- Education for Caregivers/Families

Legend

- Potential intervention
- Active intervention
- Adopted/Abandoned intervention

Note: LOR # = Level of Reliability Number, e.g., LOR 1

Collaborative average: 72%

What we are *testing* and *learning*...

- The importance of the time interval for the ASQ helps in making timely referrals for intervention
- Referral follow up is improving
- Early referrals to Help Me Grow alleviates transportation and appointment time issues at CCHMC
